Ioannis P. A. Papadopoulos

Weierstrass Institute
papadopoulos@wias-berlin.de

EMPLOYMENT

BMS Dirichlet Fellow, *Weierstrass Institute Berlin* Nov. 2023 – date

· Research interests: nonlinear partial differential equations, quasi-variational inequalities, topology optimization, numerical analysis, scientific computing, finite element methods.

Research Associate, *Imperial College London* Jul. 2021 – Nov. 2023

· EPSRC Grant: *Spectral element methods for fractional differential equations, with applications in applied analysis and medical imaging*, PI: Dr Sheehan Olver.

· Leverhulme Trust Research Project Grant: *Constructive approximation theory on and inside algebraic curves and surfaces.*

The MathWorks, Inc., *Cambridge* 2019 – 2020

· Two summer placements, with the GPU & deep learning group and the parallel toolbox group.

EDUCATION

PhD in Mathematics, *University of Oxford*, viva date: 24 Sep. 2021 2017 – 2021

· Title: *Computing multiple solutions of topology optimization problems.*

· Supervisors: Prof. Patrick Farrell and Prof. Endre Süli.

· EPSRC Centre for Doctoral Training in Partial Differential Equations.

MSc in Mathematical Modelling and Scientific Computing, 2016 – 2017
University of Oxford (Distinction)

· Dissertation: *Computing and controlling transitions in multi-stable partial differential equations* supervised by Prof. Patrick Farrell.

BSc in Mathematics, *Imperial College London* (First Class Honours) 2013 – 2016

NOTABLE PRIZES

· **IMA Leslie Fox Prize in Numerical Analysis**, second place, for the numerical analysis of divergence-free finite element methods for the topology optimization of fluids. 2023

· **MathWorks PhD scholarship** 2017–2021

· **Oxford three-minute thesis competition** (first place) 2019

· **Durham Prize**, awarded by Keble College for performance during an MSc. 2017

· **Gerald Whitrow Prize**, awarded for excellence during the final undergraduate examinations. 2016

· **Dean's List**, awarded to the top 10% of the cohort. 2016

· **London Mathematical Society** undergraduate research bursary. 2015

· Imperial College London Undergraduate Research Bursary. 2014

SUPERVISING & TEACHING

Guest Lecturer, *Department of Mathematics, Imperial College London* 2023

- "Finite elements: numerical analysis" (Part 1, MATH60022).

Co-supervisor, *Department of Mathematics, Imperial College London* 2021– 2022

- Co-supervised two 4^{th} year undergraduate dissertations.
- Co-supervised a 2^{nd} year group project on deflation who won the **Winton Capital Second Year Project Prize**.

Teaching Assistant/Tutor, *Mathematical Institute, University of Oxford* 2018 – 2021

- Courses: continuous optimization (year 3/4 course), numerical linear algebra (year 3/4 course), functional analysis I (year 3 course), numerical solution of differential equations I (year 3 course), numerical solution of differential equations II (year 3 course), scientific computing and numerical analysis of PDEs (PhD course), further PDEs (MSc course).
- Marking and presenting solutions of problems to students.

Tutor, *Oxford Study Abroad Programme, University of Oxford* 2020 – 2021

- Continuous Optimization - one-on-one tutoring covering the UCLA syllabus in 8 weeks.

MATHEMATICAL ENGAGEMENT

- Organizer of the Research Group 8 seminars at WIAS 2024–date
- Assistant in the Imperial-UCL Numerical Analysis Seminars 2022–2023
- Organizer of minisymposia at CSE23 and Biennial NA conferences 2023
- President of the University of Oxford SIAM Student Chapter 2020–2021
- Founder of the Oxford numerical analysis reading group 2019–date
- Peer reviewer for Foundations of Computational Mathematics, SIAM Journal on Scientific Computing, SIAM Journal on Numerical Analysis, SIAM Journal on Optimization, Revista de la Real Academia de Ciencias Exactas, Físicas y Naturales, Optimization Methods and Software, Structural and Multidisciplinary Optimization, Computer Methods in Applied Mechanics and Engineering, and Journal of Scientific Computing

TALKS

Highlighted talks (selected from over 40 presentations):

A semismooth Newton method for obstacle-type quasivariational inequalities

- Firedrake'24 workshop September 2024

Numerical analysis of a topology optimization problem for Stokes flow/linear elasticity

- IMA Leslie Fox Prize Competition (second place) June 2023

A sparse *hp*-finite element method for rectangles, disks, annuli, and cylinders

- Bath Numerical Analysis Seminar October 2023
- Flatiron Institute (New York) July 2023

Sparse spectral methods for fractional PDEs

- ICOSAHOM 2023 August 2023
- CSE23 in Amsterdam March 2023
- University of Leicester CSE Mathematics Seminar October 2022

Computing multiple solutions of topology optimization problems

- USNCCM17 in Albuquerque, New Mexico July 2023
- GAMM 2022 Conference - Young Researcher's minisymposium August 2022
- Oxbridge Applied Mathematics "Woolly Owl" Meeting September 2021
